

ClickStart™ My First Computer

Currently Available in Green and Pink
Ages 3 to 6 | MSRP: \$59.99

LeapFrog's ClickStart My First Computer is the first preschool learning system featuring a safe, age-appropriate desktop experience that looks and works like a grownup PC. The ClickStart system turns any TV into a child's first computer with a cartridge-based console that plugs into the TV and a working desktop and child-friendly controls—including a child-sized, wireless keyboard and convertible mouse for right- or left-handers. Four onboard games introduce keyboard navigation, mousing, counting, ABCs, phonics skills, math, shapes and colors. Each activity features leveled learning technology, which monitors players' progress and automatically adjusts the degree of difficulty—so that children are always appropriately challenged. And as with all LeapFrog products, parents can see the skills their children are practicing with the ClickStart system and games, by setting up personalized profiles for them using the online LeapFrog Learning Path tool, available at leapfrog.com.

ClickStart System Software Library

Ages 3 to 6 | MSRP: \$19.99 each

Five new ClickStart software titles will be available in 2008, for a total library of 11 great learning games. Kids' favorite characters and original LeapFrog content enhance the desktop experience.

The Backyardigans: Number Pie Samurai Available Spring 2008

Players help Master Pie Maker Tyrone and Apprentice Austin bake and defend Empress Tasha's Great Pie, while ninja-kicking their way through early math problems, mousing skill-builders and matching games.

Bob the Builder: Project: Learn It! | Available Fall 2008

Kids can build school skills alongside Bob and his crew. While learning fun facts about buildings and machines, they can practice screen navigation, shape recognition and letter sounds.

Disney Princess: The Love of Letters | Available Fall 2008

Kids can explore the wonders of pre-reading skills with their favorite princesses. While searching for Ariel's treasure or decorating Cinderella's dress, players practice letter recognition, keyboarding and screen navigation. *(Continued)*

Go Diego Go!: Animal Rescuer | Available Fall 2008

Players help Diego save baby animals in the rainforest and desert, practicing keyboard navigation, mousing skills and word-building along the way.

Scout's Puppy Pals | Available Fall 2008

Players get their puppies ready for the dog show by cleaning, dressing, and walking them, all while practicing mousing skills, counting and letter identification.
